ACCIDENT PREVENTION PROGRAM (APP)

RIG RUNNER

Accident Prevention Program

RIG RUNNER

Element 1 - Safety Orientation: Each employee will be given a safety orientation by the Safety Department when first hired. The orientation will cover the following items:

1. A description of the accident prevention program:

- We have a formal written accident prevention program as described in OSHA regulations and customer MSAs.
- It consists of this safety orientation, safety committee that is described in Part 2 below and regularly scheduled Safety Meetings
- We also have basic safety rules that all employees must follow. They are:

    - Never do anything that is unsafe in order to get the job done. If a job is unsafe, report it to your supervisor or safety committee representative. We will find a safer way to do that job.
    - Do not remove or disable any safety device! Keep guards in place at all times on operating machinery.
    - Never operate a piece of equipment unless you have been trained and are authorized.
    - Use your personal protective equipment whenever it is required.
    - Obey all safety warning signs.
    - Working under the influence of alcohol or illegal drugs or using them at work is prohibited.
    - Do not bring firearms or explosives onto customer or company property.
    - Smoking is only permitted outside the building away from any entry or ventilation intake and at designated areas on customer locations.
    - Horseplay, running and fighting are prohibited
    - Clean up spills immediately. Replace all tools and supplies after use. Do not allow scraps to accumulate where they will become a hazard. Good housekeeping helps prevent accidents.
    - Always keep yourself and others out of the line of fire.
    - Use Safe Mechanical Lifting – plan lifting operations and control the area.
    - When working around mobile equipment – “See and be seen; maintain a safe distance”.
    - Protect yourself against a fall when working at heights, use fall protection equipment as required.
    - Follow Safe Driving Rules; wear a seatbelt, do not exceed speed limits obeying all traffic laws, do not use your phone or other electronic devices when driving, plan all trips and drive only when well rested.

2. How and when to report injuries. Where first aid facilities are located.

- If you are injured or become ill on the job, report this to the supervisor on site or a Safety Representative immediately.
- There is a first aid kit located at appropriate locations at all Rig Runner facilities
- Utlize XstremeMD, whenever an injury goes beyond first aid that can be administered on site..
- We have also posted emergency phone numbers in the KPA – FLEX app, at all Rig Runner facilities and in Truck Permit Books.

3. How to report unsafe conditions and practices.

- If you see something that is unsafe or someone working unsafely, immediately report it to Truck Pusher, Safety Representative or Shop Manager.

4. **What to do in an emergency including how to exit the workplace.**

- An evacuation map for the building is posted at all Rig Runner locations. It shows the location of exits, fire extinguishers, first aid kits, and where to assemble outside.

Fire Emergency

- You will be trained on how to use a fire extinguisher as part of your orientation if that is part of your employer's fire emergency action plan.
- If you discover a fire: Tell another person immediately. Call or have them call 911 and a supervisor.
  - If the fire is small (such as a wastebasket fire) and there is minimal smoke, you may try to put it out with a fire extinguisher (only if you have been trained on how to use fire extinguishers and if you are following your employer's fire emergency action plan).
  - If the fire grows or there is thick smoke, do not continue to fight the fire.
  - Tell other employees in the area to evacuate.
  - Go to the designated assembly point outside the building or designated muster area when on a work site.

5. Identification of hazardous chemicals used at this location.

- Safe use and emergency actions to take following an accidental exposure.
- We use several chemicals, including solvents and cleaners. You will receive a separate orientation as part of our chemical hazard communication program on the hazards of these chemicals before you work with them or work in an area where they are used.

6. Use and care of required personal protective equipment (PPE).

- Some tasks in our company require an employee to wear PPE to protect against injury.
- You will be instructed by your supervisor or a Safety Representative, how to use and care for these PPE.

7. On-the-job training about what you need to know to perform the job safely.

- Before you are first assigned a task, your mentor, supervisor or a Safety Representative will show you what to do along with safety instructions and required PPE.
- We have established safety rules and personal protective equipment (PPE) requirements based upon a hazard assessment for each task.
- Do not use equipment or attempt to do any of these tasks until you have received the required training and PPE.

Element 2 - Safety Committee

- Our permanent committee will consist of a minimum 3 Safety and Operations managers or directors.
- From time to time transient members may participate in Safety Committee meetings.
- The regularly scheduled meeting is the first Thursday of each month. This may be changed by vote of the committee.
- A record of the Safety Committee decisions will be kept.

Element 3 - Employee/Contractor Safety Meetings

- They are typically held once per quarter at each Terminal location.
- All employees are required to attend.
- The leader of the meeting will designate a person to document attendance and the topics discussed.
