Crane JSA

OLD END RIG #:	Oil CO:	City:	NEW END RIG #:	Oil CO:	City:
Date:	Start Time:		Latitude:	Longitude:	
Safety Supervisor Name:			Mustar Area:	Secondary Mustar Area:	
Crane Operator:	Rigger Name:	UNIT#	Safety Notes:		

Tail Gate Safety Meeting

Start: Finish:

Everyone has the right to use STOP WORK AUTHORITY

Sequence of Job Steps	Potential Accident or Hazards	Mitigations
Load/Unload from trailer	Equipment damage, slip trips falls, mechanical failure, unlevel surfaces, spotter not present	Body placement, clear communication, 3 point contact, visual contact with spotter.
Rigging up/ Down	Pinch points, poor body placement, line of fire	365 awareness, good body position, wearing PPE & high impact gloves
Inspect Equipment	Equipment failure	Thorough inspection of all equip/ rigging equip
Spot crane into position	Lack of communication, spotter not used, unauthorized personnel in buffer zone	Keep constant communication with rigger, utilize spotter at all times, minimum 15ft buffer zone
Attach rigging for crane lift	Mechanical failure, hand/finger/body pinch points when attaching rigging, improper rigging	Ensure all equipment is tagged and certified before attaching rigging eqiuipment, keeping body parts clear of potential pinch points
Lifting equipment	Swinging load, walking under suspended loads, equipment/ personnel in the buffer zone, not using a tag line	Aware of wind conditions, 365 awareness, using tag lines on one crane picks only
Setting equipment	Swing radius, equipment damage, body in line of fire, equipment failure, poor communication, poor equipment placement	Aware of surroundings when setting equipment, keeping clear communication with rigger, driver confirms equipment placement

PPE/Safety Equipment		Vehicle & Equipment Safety		Safety Planning	
Flame resistant clothing/ Shirt/ Pants		Equipment backing (Spotter, horn , 365 walk around)		Behavioral based safety	
Hard hats/ Safety glasses/ Impact gloves/ ST boots		Parking (First move forward)		Understand job scope	
H2S Monitors/ Confim bump test 30 days		Wearing seat belt		Stop work authority understood	
Handheld Radios working/charged		Overhead power line bufferzone identified		Clean house keeping	
Safety Harness/ Lanyard		Communcation method established		Inspection completed
