Service Partner Teams,

We hope this message finds you well.

As part of our ongoing efforts to enhance site security, improve visibility of personnel on location, and streamline operations, ExxonMobil Well Delivery is implementing a new **Digital QR Code Sign-In/Sign-Out system** across all wellsite locations.

This new system applies to all Company, Contractors, Subcontractors, and Service Partners supporting our operations and is being rolled out to ensure a safer and more efficient working environment.

What to Expect with the New System:

- **Sign-In and Sign-Out Process:** Upon arrival and departure from any ExxonMobil wellsite, all personnel must check in with the Operation Supervisor and SSH&E Coach, scan the QR code, and enter their first and last name along with a valid phone number and email address.
- **QR Code Placement:** QR codes will be clearly displayed in both the SSH&E Coach and Operations Supervisor offices for easy access.
- **Compliance Requirement:** It is essential that all personnel properly sign in and out using this system to ensure compliance with ExxonMobil safety and tracking protocols.

Clear communication and participation are key to successful implementation. We ask that you share this message with your teams and reinforce the importance of following the updated sign-in/sign-out process.

This transition to a digital platform is expected to significantly enhance both operational oversight and your overall experience on site. Your support in communicating and adhering to these updated procedures is greatly appreciated.

Thank you for your continued partnership.

Best regards,

Robert M Kemper
