PERSONAL CONVEYANCE, UNIDENTIFIED DRIVING EVENTS, YARD MOVE AND TAMPERING POLICY- FOR ELECTRONIC LOGGING DEVICES AND CAMERAS

PERSONAL CONVEYANCE (PC)

The following clarifies **Rig Runner's** Policy for Personal Conveyance Allowance with an Electronic Logging Device.
It is **Rig Runner's** policy that any Personal Conveyance allowance is to address personal needs while the driver is off duty and will be considered as an Off- Duty movement. Under no circumstance is the driver allowed to utilize Personal Conveyance if they are under a load assignment. In addition, a driver cannot use the Personal Conveyance allowance if under any direction of a **Rig Runner** representative for a work assignment or On-duty/not driving activity. Personal Conveyance is not allowed if the driver is out of compliance with their 8,11,14 or 70-hour provisions. Personal Conveyance is not allowed to be used in conjunction with a 14-hour shift or while on a driver's 30-minute break or a 10-hour break.
It is further emphasized that anyone considering the use of Personal Conveyance to address that need prior to starting their shift to eliminate any confusion and/or violation. If the Director of Safety feels that the Personal Conveyance option is being abused by the driver, then the privilege will be removed until the driver can demonstrate that they can follow the policy.
Because of the potential regulatory and liability consequences, failure to adhere to this policy can result in a driver receiving disciplinary action up to and including immediate disqualification from driving for **Rig Runner.**

YARD MOVE (YM)

The following clarifies **Rig Runner's** Policy for a Yard Move with an Electronic Logging Device.
Yard Moves are considered On Duty-Not Driving and will only be used while off a regulated street, road or highway. The driver must be logged in whenever performing a yard move while on a customer's property, plant location or **Rig Runner** approved yard where minimal driving is required. The yard move will count against the driver's 14-hour clock as well as their 70-hour clock but not against their 11-hour drive time. If the Director of Safety feels that the Yard Move Option is being abused by the driver, then the privilege will be removed until the driver can demonstrate that they can follow the policy. All yard moves by a mechanic will be annotated as such.

UNIDENTIFIED DRIVING EVENT (UDE)

The following clarifies **Rig Runner's** Policy for Unidentified Driving Events with an Electronic Logging Device.
It is Rig Runner's Policy that a driver log in properly to their ELD prior to any movement of the vehicle they are operating and remain logged in until all vehicle movement has been completed for their trip or shift. All Unidentified Driving Events should be claimed by the driver immediately after they are discovered. All yard moves by a mechanic will be annotated as such. Terminal management personnel including but not limited to Terminal Managers, Dispatchers and Safety Supervisors will work together to ensure Unidentified Driving Events are all addressed to the point where are UDE have been assigned and accepted by the driver responsible for the events.

TAMPERING POLICY

Although the following violations are not all-inclusive, any findings of fault determined by the **Rig Runner** Safety Department based on the actions of the driver will result in disciplinary action up to and including disqualification from driving for **Rig Runner.**

TAMPERING AND DISABLEMENT

Any damage, destruction, tampering, altering, obstruction or disablement of any safety sensitive equipment (To include but not limited to the Electronic Logging Device, GPS, Cameras, Communications Devices, ECM, and/or Engine Speed Governor) will result in an immediate review by the **Rig Runner** Safety Department to determine the Status of the driver's Safety Clearance.
Damage, destruction, tampering, altering, or disablement includes the knowledge of logging out of the Electronic Logging Device or Camera while driving, disconnecting or creating a false system failure.

The Terminal Manager and Safety Supervisor will discuss and work together in determining the severity of any infraction and determine the appropriate disciplinary measures to be taken. Disciplinary measure may include counseling, retraining, suspension and leading up to and including termination of employment or contract. Depending on the severity of the infraction, immediate termination may be necessary.

I _____ have read and understand **Rig Runner's** Policies on Personal Conveyance, Yard Moves, Unidentified Driving Events and Tampering and agree to follow these policies as it pertains to **Rig Runner** Electronic Logging Devices and Cameras.
